

COMMANDS FOR EIEWS 11

TWO WAYS TO PROCEED

1°) Fast-track procedure (p.1)

2°) Extended procedure (p.3)

- a) Implementation
- b) Building the Seemingly Unrelated Regression 1 (Vote function) (p.7)
- c) Building the Seemingly Unrelated Regression 2 (Swing ratio) (p.13)

1°) Fast-track Procedure

After opening your Eviews software, follow the commands below:

- File
- Open
- EViews workfile to download from DATAVERSE : “**2025 german election-jerome-jerome-lewis-beck-EIEWS-FILE-for_dataverse.wf1**”

The database and programs appear in the workfile window

→ To run the SUR Vote function for the german parties (see below) :

- Click on “sys01sur” system file
- Click on [View] and then [System specification] to check the equation formula
- Click on [View] and then [Representation] to see the estimated equations and substituted coefficients

- Click on [View] and then [Estimated output] to see the estimation window and statistics

→ To run the SUR Seats Swing Ratio for the german parties (see below) :

- Click on “sysseatsur” system file
- Then follow the same procedure as above

2°) Extended procedure

a) Implementation

- **File**
- **Open**
- **Foreign Data as Workfile**

- **Download from DATAVERSE “2025 GERMAN ELECTION-JEROME-JEROME-LEWIS-BECK-DATABASE-FOR_DATAVERSE.xlsx”**
- **Then carry out the following steps 1 to 4**

EViews

b) Building Seemingly Unrelated Regression 1 (Vote function)

Commands

- **Object**
- **New Object**
- **System**

→ **TYPE** the following equations lines in the System window :

INCMAIN = C(1) + C(2)*POPINC + C(3)*DU + C(4)*GCOAL0921 + C(5)*KANZINC + C(6)*AFD1321 + C(7)*DUM72 + C(8)*STRAUSS80

OPPMAIN = C(9) + C(10)*POPOPP + C(11)*DU + C(12)*dissol05 + C(13)*AFD1321 + C(14)*gruneopp

FDP = C(15) + C(16)*COINCFDPCSU + C(17)*COINCFDPSPD + C(18)*COOPPFDPCSU + C(19)*FDPINF5 + C(20)*DUM21 + C(21)*FDP02

GRUNE = C(22) + C(23)*POPGRUNE + C(24)*COGRUSPDINC + C(25)*NOGRUNE + C(26)*REUNIF

farleft = C(27) + C(28)*popfarleft + C(29)*NOLINKE + C(30)*NEWLEFT0521

faright = C(31) + C(32)*POPfaright + C(33)*afd1321

OTHERS = C(34) + C(35)*POPOTHERS + C(36)*FW1321

NOTE: the alternative way is to drag and drop the “[sys01sur](#)” system file from the file “[2025 german election-jerome-jerome-lewis-beck-EVIEWS-FILE-for_dataverse.wf1](#)” downloadable from DATAVERSE

- Estimate

- Choose <Seemingly Unrelated Regression>

SUR Vote function Results
